

# Software Assurance

Keep your Seawing software up to date

Our Software Assurance service provides customers with long-term maintenance and support for SIS software.

## Technical advantages

### Access to the latest fixes and features

The security system remains up to date and the latest features are always available. Free access to the main and sub versions that released. Using the latest version, we can ensure that our system will be constantly compatible with the newly released hardware elements.

### IT Security

Security system software is also part of the IT system that is regularly attacked by hackers with good and bad intentions. Software assurance provides system security enhancements to protect your data

### Assistance

Priority is given to partners with software assurance. This way, notifications from users of the latest version can be resolved more quickly by not having to scan older versions.

### Investment protection

Software assurance guarantees investment protection and enables long-term trouble-free operation in a rapidly changing environment.

## Economic benefits

### EFFICIENCY

Software assurance and regular updates can ensure and prevent an unwanted operational (itt van egy helyesírási hiba a magyarban) problem this way colleagues can focus on their task and get it done without wasting time.

### ECONOMY

A prepaid pricing structure is more cost-effective solution, than one-time troubleshooting or full version upgrade fee.

### COMPUTABILITY

Annual payment means no need to pay ad hoc fees.

### DEVELOPMENT

Software assurance is a prerequisite for developing personalized features.
